

Reverse Osmosis Water Treatment Plant

City of LaBelle, Florida

Services Rendered

- Conceptual Water Plant Design
- Funding Application and Support
- Detailed Design
- Construction Administration
- Rate Analysis

Project Summary

ATM has been the city of LaBelle's engineer for over 12 years. During that time, ATM has assisted the city with both the engineering and financing aspects of a variety of water and sewer projects. With the growth of southwest Florida, LaBelle is anticipating significant growth in the coming years. The city's 5-year Capital Improvement Program includes over \$30 million for construction of a new water treatment plant and associated facilities.

The team of Applied Technology and Management, Inc., Burton & Associates, and Rose, Sundstrom, and Bentley, LLP, is preparing the engineering, federal funding, and financing for this major project (the largest in the city's history). This project involves the following aspects associated with funding.

- Identifying Available Funding Sources
- Coordinating with Funding Agencies
- Preparing Necessary Reports and Applications
- Conducting Rate Analysis
- Providing Information and Updates to City Commission and Public
- Preparing Loan Documents
- Coordinating with Consortium of Banks
- Conducting Project in Accordance with Federal Funding Guidelines
