

Ginn Sur Mer Resort Marina

Ginn Development

Grand Bahama Island

Services Rendered

- Marina and Coastal Engineering Design Services
- Dredging Design and Support
- Hydrographic Surveying
- Environmental Assessments
- Coastal Structure Evaluations and Design
- Shoreline Change Analysis
- Navigational Assessment
- Marina Basin Flushing Analysis
- Artificial Reef Design
- Environmental Management Plan (EMP)
- Environmental Compliance Management

Project Summary

ATM is working with a large development group to construct a resort facility on Grand Bahama Island. ATM's responsibilities include the complete planning, final design, and layout of the marina, entrance channels, turning basins, and other associated structures and amenities. Additional work on this project includes shoreline stabilization, sediment transport, dredging issues, bathymetric surveying, and environmental impact assessments. ATM provides environmental compliance management for the project.
